### Lab Assistant

#### **AgroSavfe NV**

The increased attention to food safety and sustainability imposes more and more restrictions on the agricultural practices, while there is a demand for an increased supply of more and healthier food. Therefore, improving production efficiency in a sustainable way, without causing irreparable damage to our environment or depleting valuable resources, is essential. AgroSavfe has the ambition to contribute to a safer production and healthier food. AgroSavfe is focusing on biological molecules to tackle pests and diseases using a novel class of biological control agents based on single domain antibody fragments (Agrobodies®), directed against pests' and pathogens' essential molecules.

More information about Agrosavfe's technology and strategy can be found on [www.agrosavfe.com](http://www.agrosavfe.com)

#### **Laboratory Assistant**

AgroSavfe is looking for a highly motivated Laboratory Assistant to strengthen the team, and support the research and development activities across the organization.

Specifically, the Laboratory Assistant will be responsible for the maintenance of reagents and stocking of supplies. You ensure lab materials are compliant with AgroSavfe's internal quality and safety standards and procedures.

#### **Tasks and responsibilities**

The key tasks and responsibilities of the Laboratory Assistant:

- Maintenance of laboratory reagents and disposable stocks, ensuring the laboratory is well-stocked and resourced
- Accurate labeling of laboratory reagents and buffers
- Equipment maintenance
- Maintain computer database with relevant information pertaining to lab material and equipment
- Ensure compliance with internal quality and safety standards and procedures

#### **Qualifications and skills**

- Education in Laboratory-related Sciences, with a high sense for accuracy
- Previous experience in working in an industry environment is a plus
- Knowledge and hands on experience in general laboratory practices
- Knowledge of MS Office excel and word software packages
- Good communication skills
- Ability to work independently
- Scientific integrity

## Job opportunity
